

KEVIN BRODZINSKI

AI PRODUCT & SYSTEMS ARCHITECT | FOUNDER | ENTERPRISE GTM LEADER

Venice, CA | 561-212-9938 | kevinbrodzinski@gmail.com | linkedin.com/in/kevin-brodzinski

PROFILE

Founder and cross-functional AI systems architect with a mechanical-engineering foundation and a record of turning ambiguous, multi-domain problems into product architecture, executable systems, and commercial outcomes. Conceived and built substantial AI-assisted reference platforms spanning agentic workflows, governed memory and retrieval, semantic/graph intelligence, AI safety and state governance, recursive discovery, real-time coordination, and evidence-aware decision infrastructure. Earlier career includes major enterprise revenue growth, national-account leadership, startup GTM, and zero-to-one product delivery.

AI & PRODUCT STRENGTHS

- AI product strategy & zero-to-one architecture
- Agentic workflow / tool-use design
- Stateful memory, RAG & semantic graph retrieval
- AI governance, admissibility, receipts & replay
- Human-in-the-loop review & finalization systems
- React / TypeScript product architecture
- Supabase / PostgreSQL / pgvector / PostGIS
- Realtime, Edge Functions & event-driven workflows
- AI-assisted development & rapid prototyping
- Enterprise GTM, pilots, pricing & strategic accounts

EXPERIENCE

Founder & AI Systems Architect | FLOQ, Inc. / Density

2025 - Present | Venice, CA

AI-native coordination, memory, governance, and decision infrastructure.

- Originated an AI systems architecture spanning governed memory, structure-native retrieval, agent action control, adaptive security, recursive discovery, evidence/authority-aware state formation, and outcome-calibrated learning.
- Built substantial founder-created reference systems with AI-assisted development workflows, translating original concepts into data models, APIs, interfaces, real-time/geospatial behavior, retrieval and memory flows, verification, financial state, and operational control loops.
- Designed Formation Intelligence + Muon: a governed intelligence/control architecture for hidden-state reconstruction, safe probing, intervention simulation, trusted-state promotion, receipts/replay, and learning from observed outcomes.
- Designed SmartPeers and Mathematics Vault concepts for AI-assisted peer review, canonical knowledge management, duplicate/variant detection, structural retrieval, proof-gap discovery, and artifact finalization.
- Developed and filed 100+ provisional patent applications covering interlocking layers of AI/coordination infrastructure, including memory, governance, security, retrieval, verification, attribution, value routing, control, and adaptive systems.
- Authored publication-oriented research and technical constitutions across Coordination State Dynamics, Formation Intelligence, relational formation, topological coordination failure, recursive computation, and adaptive system time.

Vice President of Sales / Early CTO | Stic Solutions, Inc.

2024 - 2025 | Santa Monica, CA

Adtech startup focused on mobile out-of-home advertising.

- Built the outbound sales engine, closed national-brand pilots including Hyundai Capital, Whims, and Passes, and grew pipeline to seven figures.
- Led Sales, Client Success, and Partnerships; built CRM, compensation, onboarding, reporting, pricing, and pitch systems; increased campaign close rate by 40%.

Head of Client Strategy | Rocket Design

2022 - 2024 | Los Angeles, CA

Zero-to-one product studio for early-stage companies.

- Scoped, sold, and helped ship 10+ MVPs and digital products using modern no-code / low-code stacks including FlutterFlow, Supabase, and Webflow.
- Translated founder ambiguity into product scope, UX, workflows, launch plans, and \$5K-\$30K client engagements; also built Collaborate LA, drawing 100+ founders per event.

EARLIER COMMERCIAL & ENGINEERING EXPERIENCE

Director, Business Development | Warp Technology Co.

2023 - 2024 | Los Angeles, CA

- Led outbound and sales processes for a supply-chain technology startup; reported 30% revenue growth and 15% margin improvement while closing major-brand opportunities.

Director, National Accounts - West Coast | RXO (formerly XPO)

2022 - 2023 | Santa Monica, CA

- Generated approximately \$30M in new and existing revenue growth and increased revenue in underperforming accounts by 45% through service and engagement redesign.

Director, National Accounts | XPO Logistics (NYSE: XPO)

2021 - 2022 | Los Angeles, CA

- Achieved approximately \$17M in revenue growth while managing 40 national accounts; coordinated sales execution across 30 teams and 8 divisions.

Business Development Manager | Capstone Logistics

2019 - 2021 | Chicago, IL

- Top revenue generator with 700%+ year-over-year growth; secured \$3.1M in revenue and finished at 218% of target in 2020.

Founder / CEO | Good Circles Clothing

2017 - 2019 | Chicago, IL

- Launched and operated a menswear brand across product, marketing, sales, and experiential activation; hosted 25+ pop-up events across major U.S. cities.

Stress Analysis Engineer | D3 Technologies

2013 - 2014 | Dallas, TX

- Performed aerospace structural/stress analysis and weight-optimization work under real engineering and regulatory constraints; reported 5% aircraft-weight reduction in project work.

SELECTED AI / RESEARCH WORK

- Governed AI / agent infrastructure: trusted-state formation, memory admission, action admissibility, authority separation, receipts, replay, repair, and nullification.
- Advanced memory and retrieval: vector + graph + topology-aware retrieval, semantic bridges, provenance, contradiction preservation, canonicalization, and long-horizon memory state.
- Adaptive computation: recursive discovery, active observation, intervention simulation, bounded self-improvement, phase-adaptive security, and outcome-driven calibration.
- Research/product systems: FLOQ Social, HeySapphire, computational research environments, SmartPeers, Mathematics Vault, Formation Intelligence, Muon, and Density.

EDUCATION & RECOGNITION

B.S., Mechanical Engineering | Southern Methodist University | 2011 - 2015

Provost Scholar; Engineering Fellows Scholar

Selected recognition: Global Leadership MVP Award (XPO, 2021); BDM of the Year (Capstone, 2020); Hyundai Capital pilot closer (Stic, 2025).
